Stainless Steel Screws

We are the reputed manufacturer of a wide assortment of stainless steel screws. The screws we make are used in many industries like metal, marine, plumping, PV systems, etc. The stainless steel screws have excellent features like anticorrosive nature, strong, durable, accurate dimension, etc. These screws are offered at the most affordable price range.

Stainless Steel Grub Screws

The grub screws are also known as set screws. They are headless screws that are used to fix the parts to any kind of shaft. The stainless steel grub screws are fitted into the shaft till it gets completely into the rotating part. They are useful in performing important tasks like assembling the machine parts, engines, etc.

Din 933 Stainless Steel Hex Screws

We offer a comprehensive range of Din 933 stainless steel hex screws. They are used in various kinds of industrial purposes. We make them as per the standards specified by the industries to accurately meet the needs of the industry and different application areas. The D 933 stainless steel hex screws we make are fabricated from best grade SS material to produce durable screws.
